

HERO PRIME™

HP03 - Prime Homopolymer - 3.5 Melt

Description

HP03 is a prime, natural, homopolymer polypropylene. For more information on processing conditions, please contact your sales representative.

Characteristics

| | |
|--------------------------------------|----------------------|
| Status | Commercial: active |
| Test Method Used | ASTM |
| Availability | North America |
| Processing Methods | Extrusion |
| Features | Low Water Carry-Over |
| Typical Customer Applications | Slit tape and fibers |

Typical Properties

| | Method | Value | Unit |
|---------------------------------|---------------|--------------|-------------------|
| Melt Flow Rate | D1238 | 3.5 | g/10 min |
| Density | D1505/ D792 | 0.903 | g/cm ³ |
| Tensile Yield Strength | D638 | 5,455 | psi |
| Tensile Yield Elongation | D638 | 10.4 | % |
| Flexural Modulus | D790A - D790 | 245 | kpsi |
| Notched Izod (23°C) | D256 | 0.8 | ft-lb/in |
